Tester's documentation

Account creation

All fields must be filled out, terms & conditions must be accepted. Email must be in a correct format; username must be at least 4 characters long and cannot contain any special character. The passwords must match inside the two-password input field and must be at least 8 characters long. In any other case the user will receive an error message as a toast:

Examples for different error messages in case of:

- Empty input fields:

[field] must not be empty.

- Wrong input format:

[field] is empty.

- Not matching passwords:

Passwords must match.

In case of successful registration, the user will be redirected to the login page.

Login

All fields must be filled out and with correct credentials. In any other case the user will receive an error message as a toast:

Examples for different error messages in case of:

- Empty input fields:

[field] is empty.

- Invalid credentials:

Bad credentials

In case of successful login, the user will be redirected to the homepage.

Profile

Username field must be filled out with the user own or a new, not existing username. Username must be at least 4 characters long and cannot contain any special character. Full name cannot contain any special character or number. Phone number must start with a + sign and can contain only numbers. In any other case the user will receive an error message as a toast:

Examples for different error messages in case of:

- Empty username field:

Username is empty.

- Existing username given:

Username is taken.

- Wrong input format:

Phone number must start with a '+' and only contain numbers.

In case of successful profile editing the edit modal closes, and the profile updates to reflect the changes.

Password change

Both password fields must be filled out. The passwords must match inside the two-input field and must be at least 8 characters long. In any other case the user will receive an error message as a toast.

The error messages are the same as in the registration password part.

In case of successful password changing the password edit modal closes and the user will get the following toast message:

Password changes successfully.

Create and update items

Picture must be provided for the item. Both title and description fields must be filled out. In any other case the user will receive an error message as a toast.

In case of successful item creation or update the user will get a toast saying the item has been created, and the item will appear on the profile page's inventory section.

Sending offers, reporting items

In case of any error the user will receive an error message as a toast.

Different error messages:

- When user tries to report an item again:

Item already reported.

- When user tries to send an offer again for the same items:

Trade offer already sent.

- When user already received a trade offer with the same items:

Trade offer already received.

In case of successful reporting a toast will be shown. In case of sending a trade offer successfully the modal will be closed, and the trade offer will appear for both users on the Trade Offers page.
